TELE ^{DI} *Marmo* ONYX

Tele di Marmo Onyx celebrates the seductive beauty of onyx: its intriguing translucent quality; the rich, contrasting transparent layers and the infinite shifts in tone. The collection presents five ceramic marbles that not only reveal the secret beauty of nature, but also strive for the perfection and uniqueness of a work of art.

The magnificence of the large size accentuates the deep-set patterning and chromatic opulence of the five exquisitely natural reference materials, reworked and calibrated in every detail. The shade variations and transparent effects that typify onyx are stratified below the surface, for a refined three-dimensional impression. Thanks to its exceptional flatness and completely uniform mirror finish, Tele di Marmo Onyx is a sophisticated and sumptuous ceramic marble collection, destined to stand the test of time.

Versatile and available in a wide range of sizes, this collection offers architects and interior designers a unique and precious aesthetic heritage that clearly conveys the character of any residential space, and most commercial spaces too. Tele di Marmo Onyx represents another important milestone in Emilceramica's ongoing aesthetic studies dedicated to the finest and most precious of minerals, a timeless icon of elegance that transcends the whims of fashion.

ONYX IVORY

The consummate pureness of Onyx Ivory is revealed in an intricate kaleidoscope of bright nuances ranging from white to ivory: subtle shifts in tone that give the surface a delicate impression of movement.

ONYX PINK

**From white to blush,
encompassing too the coral
pink hues of richer, more
variegated transparent layers
that shine through: Onyx Pink
is sophisticated and refined.**

ONYX GREEN

Lighter shade variations intersect the green of the background, tracing the surface. Large and variegated, the mineral inserts of Onyx Green bloom with crystals ranging from ice grey to rust in colour.

ONYX BLUE

Onyx Blue reveals a multi-faceted colour spectrum that revolves around delicate pale blue. The juxtaposition of light and dark shades creates the impression of stratification of the material below the surface.

ONYX BLACK

Lavish and spectacular, Onyx Black seems to descend into the unfathomable depths of matter. Shades of pearl, ivory and rust emerge from a black that appears bottomless in points, outcropping like mysteriously beautiful fossil finds and minerals.
